

GRAPE RECEIVAL MAGNETIC SEPARATION SYSTEM

HACCP International Endorsement

EFFECTIVE DESIGN TO EXTRACT METAL CONTAMINANTS SUCH AS STAPLES, NAILS, WIRES, ETC TO PREVENT DAMAGE TO EQUIPMENT SUCH AS PUMPS, CRUSHERS & PRESSES IN THE WINE INDUSTRY

USES:

- **Receival Bin Magnets**
- **Must Pump Protection**
- **Compliments Harvester Magnets**

RESULT:

- **Cuts Damage**
- **Cuts Downtime**

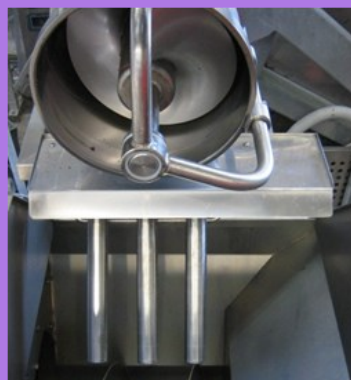

BENEFITS:

- **Monster Magnet Power thanks to RE80™ Rare Earth Magnetics.**
- **Robust design for high impact areas.**
- **Anti wear options.**
- **Protect expensive machinery from damage and prevent metal contamination.**

Manufactured by MAGNATTACK Global™ - Metal Fragment Control Solutions.

Available worldwide for purchase through MAGNATTACK Global™.

Unique MAGNATTACK™ Design

WON'T BRIDGE OR BLOCK!

MAGNATTACK™ Grape Receival Bin Magnets are an essential item for wineries to protect crushers, destemmers and pumps from a variety of tramp iron contaminants such as staples, nails, wire and wear particles from harvesters and machinery. A typical MAGNATTACK™ Receival Bin Magnet is mounted under the auger outlet and has a number of magnetic 10,000 gauss Finger Bars angled down into the destemmer and is mounted on a heavy duty adjustable mounting so that the bar spacing and slope can be varied to suit different auger outlet dimensions and product characteristics.

We **CAN** provide experienced magnet solutions!
