

MAGNATTACK™ Global provides solution to metal fragments being walked into sensitive food production areas

MAGNATTACK™ Global have developed a high strength magnetic mat system designed to reduce food safety risks by providing a special magnetic floor mat to provide Metal Fragment Transfer Control of Ferrous Metal being “walked “into sensitive production and office areas in the food, beverage, meat and pharmaceutical industries.

I recent times MAGNATTACK™ Global, via a distributor, has provided magnetic mat solutions to a major poultry processing company for 2 of its plants in the Brisbane Australia area, along with supply to major dairy, biscuit and cereals processing companies in Australia.

Here is what they are saying... “it’s a very effective tool. We collect the metal off it and analyse the quantities collected each week. Great for keeping track of metal coming in” and “ it works well, easy to clean and maintain – great food safety initiative”

MAGNATTACK™ magnetic mats are available worldwide and carry international endorsements making it a world leader in metal fragment transfer control in the food industry.
